AWD
Non Production

Capacity Notes for Rotary, Turbo, and Supercharged engines:
For Rotary powered vehicles or any Boosted engine – capacity is adjusted by multiplying by 1.7. For any Boosted Rotary engines – capacity is adjusted by multiplying by 1.7 x 1.7.

Management has the right to expel any person from the event and the Venue that they consider to be acting in a manner which endangers or impacts on other peoples' enjoyment of the event activities or causes a complaint to be brought to management via the officials.

Clothing for drivers and crew must be appropriate for the motorsport Activity being undertaken. This means at least enclosed footwear with full coverage from ankle to wrist to neck for drivers and any crew working on the vehicle. (For Doonan short sleeves are permitted). Helmets must meet or surpass the AS1698 requirements.

Officials are volunteers giving their time so you can enjoy your sport and shall be treated with due respect. Official's directions must be followed promptly, with full compliance and in good grace. Any driver or crew that has a problem with a direction from an Official shall carry out that direction immediately and then raise the issue with Management for its consideration.

Vehicles must be driven SLOWLY at all times and in ALL AREAS until they are actually competing or participating in an event. This means MAX SPEED in pit area IS 10 KPH up to the start line and IN ALL OTHER AREAS. Drivers exceeding these limits should expect to be at least cautioned or not permitted to start in one or runs and potentially be expelled from the Venue.

Nobody under the age of 12 is permitted inside the General Pit area without close adult supervision. Children 5 or under MUST be carried at all times. Children may be excluded from Pit area at the direction of an official. Safety Scrutineers require the car to be properly prepared for the event. This includes steering and brakes, especially pads and fluid and all safety equipment especially seats and restraints shall be in excellent condition. Race apparel must be in excellent condition.

Vehicles must not be modified after scrutineering. All vehicles must be fitted with body panels if they were originally designed with them. No sharp or exposed edges are permitted on the external of the vehicle.

A fire extinguisher is not mandatory, however it is highly recommended and when fitted to the vehicle, must be bolted through the body and within reach of the driver with quick release fittings capable of holding the extinguisher in place at 40G.

THIS IS NOT A DRIFTING EVENT. This is a sprint style event and any drifting may result in cancelled runs or being sent home from the event. Drifting is defined as intentionally sliding through a corner or setting up to enter a corner sideways. Burnouts or stationary wheel spinning that results in excess smoke or noise will also result in penalties. This is to be ruled upon by the marshals and the Clerk Of Course (CoC).

Sound limit for this venue is 98db at 10m at max revs.

Drivers must hold a Racers Clubman (or higher) Licence issued by a RACERS.

No animals are permitted into the Venue during an event unless they are part of the event and have written permission from the management to be on the premises.

A refund is available 7 days prior to an event if unable to attend. Between 7 days and 2 days prior to the event your event entry can be moved to another event if possible. Less than 48 hours prior to event start there is no cancellation or move option available.

The overarching objective is to bring fun to recreational motorsport at the lowest possible price to our customers – we seek your support to achieve this by asking you to help us look after our Venues, facilities and equipment.

The final results will be read out at the presentations that will be within 10 mins of the completion of the final run. You must be at the presentation to receive a trophy.

Results will be calculated by your single fastest time of the day. Only runs will count if you do not hit a cone, and if you come to a complete stop, 100% inside the finish box.

There will be a sighting run at the beginning of each event to show track layout.
